Trauma-Responsive Risk Screening & Brief Interventions

ΛDΛM is a ***first-in-nation*** **health tech system** designed by both clinical and technology experts to support youth and professionals with **validated screening tools, brief interventions, provider actions, data integration, and a full analytics suite**. The first of its kind, ΛDΛM helps professionals move from trauma-informed principles to **trauma-responsive practices** to drive measurable, positive change in youth. ΛDΛM is the technology backbone of Rising Together Schoolwide Mental Health Screening™ and supports the professional skill-building delivered through MITEY Change.

ΛDΛM's Trauma Responsive Design

Reduces cognitive load and increases engagement.

Incorporates an inclusive design of the screening tools to reduce youth cognitive load, increase engagement, and create an empathetic environment for completion

Promotes clarity and transparency.

Ensures youth understand the screening process, content of the questions, and their options for completion

Provides immediate, tailored feedback.

Provides youth with immediate feedback and resources tailored to their responses and ensures they have an opportunity to process their feelings following completion

ΛDΛM is Different!

- Comprehensive suite of screening tools (like the PHQ & GAD) enhanced within a **culturally-responsive trauma framework** to support youth and young adults
- Youth receive immediate evidence-based feedback that they can email to themselves for later review
- **Fully customizable** screening allows tools to be stitched together or embedded based on question responses. ΛDΛM can also incorporate organization-specific screening tools
- Remote options to send a screening to an office device, cell phone or email address
- Alerts for survey completion, survey scores, referrals & case management

ΛDΛM Decreases Workload by Automating

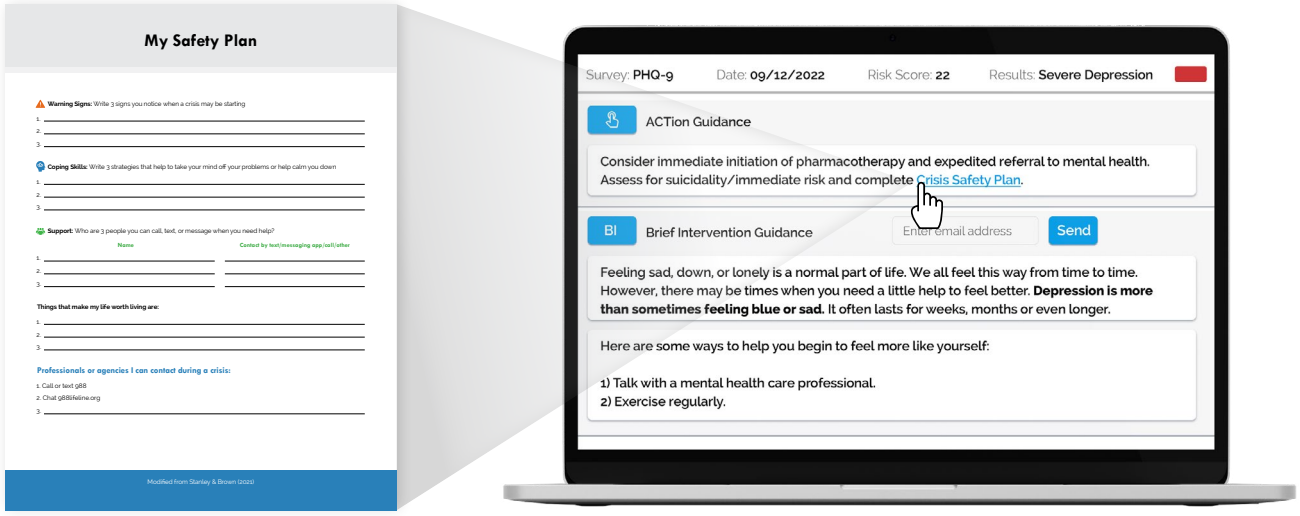
- Opt in/out parent consent
- Client Satisfaction surveys
- Integration and data matching with your other systems – medical, dental, immunization, academic

Professional Support Includes:

- ACTion protocols, workflows and next steps corresponding to survey results
- Clickable worksheets and crisis plans
- Brief Intervention Guidance to support discussions with youth
- National resources and referrals

The tools available within ΛDΛM include:

- PHQ 2-4-9
- GAD 2-7
- PEARLS
- ASQ
- C-SSRS
- CRAFFT 2.1+N
- S2BI
- TELL-TALK-VENT
- ACT NT/SH
- Hunger Vital Sign
- Social Needs Screening Tool
- PHQ-A
- RAAPS
- PSC17-Y



Full Analytics Suite

ΛDΛM manages data in real time to report common data points like numbers of youth served, visits and screenings completed as well as digging deeper into the data to create reports answering questions like:

- ✔ What are the greatest risks in my youth population
- ✔ What disparities exist
- ✔ Are we making a difference in youth risk over time
- ✔ What provider actions are taken most often
- ✔ How many and what referrals were provided
- ✔ How many youth with referrals received services
