

# Trauma-Responsive Technology

Your Answer for Better Youth Support

## Why ADAM

ADAM was designed by clinicians and developed by software experts to equip professionals with hi-tech evidence-based tools to **guide youth and young adults toward healthier, safer lives.**

### Trauma-Informed Care

- Organizational awareness
- Professional education, development
- Acknowledgement of widespread impact
- Focus on establishing trust, collaboration

### Trauma-Responsive Practices

- Universal screening
- Early identification of risks
- Actionable, measurable next steps
- Prevention

## ADAM's Trauma Responsive Design

Incorporates an inclusive design of the screening tools to reduce youth cognitive load, increase engagement, and create an empathetic environment for completion

Ensures youth understand the screening process, content of the questions within the screening tools, and their options for completion

Provides youth with immediate feedback and resources tailored to their responses and ensures they have an opportunity to process their feelings following completion

### ADAM Supports Trauma Practices

- Action protocol guidance
- Workflow suggestions
- Next steps corresponding to screening results
- Clickable worksheets and crisis plans you can use in real-time during a visit
- Brief intervention guidance that supports discussions with youth
- National resources and referrals, customizable to your community

### ADAM Provides Actionable Data

Manages data in real-time and populates common data points that answer questions such as:

- What are the greatest risks to my youth population?
- What disparities exist in my youth population?
- How are we making a difference in youth risk over time?

Creates customizable data snapshots

"ADAM does it all...engages our youth, supports our provider, links to community referrals and resources, integrates our other data systems, and puts all of this information into reports we can actually use!"

- Nurse Practitioner, School-Based Health Center

Schedule your 1:1 today to learn more about ADAM and be among the first to use its trauma-responsive, hi-tech to support the youth and young adult communities you serve!
